14 August 1984

OC-MLS WEEKLY STAFF NOTES
FOR WEEK OF 6-10 AUGUST 1984

25X1

2. Discussions have been held with the D/CO regarding end-of-year surge funding scenarios. The funds, if available, can be usefully applied to the major Capitalization projects (SKYLINK, HF, etc.).

25X1

3. A memorandum was forwarded to all the OC Divisions asking for their input to the 1984 NCS Annual Report. Our contribution to the annual report last year was not as comprehensive as we desired due to extremely short notification from NCS.

4. IMS/FSG has provided \$83.5K to purchase tools and materials to assemble CRAFT tool kits for field deployment. Procurement action has been initiated. These tool kits, which will contain many Wang-unique gauges, tools and expendable parts, have been sorely needed by our people in the field.

5. SINAG has determined that the Agency does not require future production of KG-30 series cryptographic equipment. CSD will advise NSA accordingly.
